## Faith Building Trip

A group of our membership took an amazing trip to the Ark Encounter in Williamsburg, KY. It was a faith building trip! The Ark Encounter is a life size replica of the ark from the book of Genesis. It also does a wonderful job explaining how all the things that God told Noah to do were not only possible, but probable! It also shows history from a Biblical perspective and gives the scientific evidence that what God has said in the Bible is not only accurate, but more scientific than the theories presented by the atheistic world view.

Many of us confront false ideas each day. We especially have to be able to give solid answers to the questions asked by those who do not believe or are struggling with their faith. The answers are there if we will take the time to study and prepare ourselves! We should never be afraid of science because God created all the scientific principles that man has discovered!
